SVENSKA GEOFYSISKA FÖRENINGEN

Tellus

A BI-MONTHLY JOURNAL OF GEOPHYSICS

Volume 25 · 1973

Printed in Sweden by

Almqvist & Wiksell, Uppsala 1973

Editor
B. BOLIN
Stockholm
Sweden

Executive Editor
P. KÅLLBERG
Stockholm
Sweden

Office of the Editor: Arrheniuslaboratoriet, Fack, S-104 05 Stockholm

Contents

Volume 25, 1973

NUMBER 1

V. P. Starr: Remarks on the progress of general circulation studies 1

W. Blumen: Stability of a two-layer fluid model to non-geostrophic disturbances 12

H. Lejenäs: Energetics of a developing wave in the westerlies 20

M. J. Manton: On the growth and decay of a deep water wave component 36

D. Davies and M. Olson: Precipitation forecasting at the Canadian Meteorological Center 43

B. Bolin and H. Rodhe: A note on the concepts of age distribution and transit time in natural reservoirs 58

L. Phan-Cong and P. Dihn-Van: Direct measurements of coalescence efficiency and frequency of small water droplets in an electric field 63

S. R. Pal: Features of sodium emission in nightglow 69

A. O. Sanni: Seasonal variation of atmospheric radioactivity at Ibadan 80

Shorter Contribution

W. E. Langlois: A rapidly convergent procedure for computing large-scale condensation in a dynamical weather model 86

NUMBER 2

J. A. Dutton: The global thermodynamics of atmospheric motion 89

C-Y. Tsay and S. K. Kao: An investigation of the spectral structure of atmospheric waves near a jet stream 111

T. Elvius and A. Sundström: Computationally efficient schemes and boundary conditions for a fine-mesh barotropic model based on the shallow-water equations 132

T. R. Sundaram and R. G. Rehm: The seasonal thermal structure of deep temperature lakes 157

S. C. Mehrotra: Limitations on the existence of shock solutions in a twofluid system 169

C. Keeling: Industrial production of carbon dioxide from fossil fuels and limestone 174

A. Druilhet and J. Fontan: Utilisation du thoron pour la determination du coefficient vertical de diffusion turbulente près du sol 199

B. Dzienis and M. Kopcewicz: Application of the Mössbauer effect in investigations of iron concentration variations with air radioactivity 213

NUMBER 3

V. P. Starr: The parameterization of dynamic processes 219

D. G. Vincent and L. N. Chang: Some further considerations concerning energy budgets of moving systems 224

L. Steinberg: Numerical simulation of quasi-geostrophic turbulence 233

C.-M. Tang: Seasonal variation and latitudinal distribution of the instability of two-level quasi-geostrophic waves in horizontal shear 247

N. D. Bang: Characteristics of an intense ocean frontal system in the upwell regime west of Cape Town 256

Y. Tzur: One-dimensional diffusion equations for the vertical transport in an oscillating stratified lake of varying cross-section 266

S. J. Glass and M. J. Matteson: Ion enrichment in aerosols dispersed from bursting bubbles in aqueous salt solutions 272

S. Israelsson, E. Knudsen and E. Ungethüm: Simultaneous measurements of radon (Rn^{222})

and thoron (Rn^{220}) in the atmospheric surface layer 281

E. Førland: A study of the acidity in the precipitation in Southwestern Norway 291

L. Kristjansson: The net magnetic moment of an assemblage of randomly oriented dipoles 300

Shorter Contributions

W. Bischof: Carbon dioxide concentration in the upper troposphere and lower stratosphere. III 305

G. I. Pearman and J. R. Garratt: Space and time variations of tropospheric carbon dioxide in the southern hemisphere 309

NUMBER 4

Knox T. Williams and William M. Gray: Statistical analysis of satellite-observed trade wind cloud clusters in the western North Pacific 313

B. G. Hunt: Zonally symmetric global general circulation models with and without the hydrologic cycle 337

Raymond J. Deland: Spectral analysis of traveling planetary scale waves: Vertical structure in middle latitudes of northern hemisphere 355

Bernhard Lettau: Eddy diffusion coefficients in the stable atmospheric surface layer 374

D. Guedalia, C. Allet, J. Fontan and A. Druilhet: Lead-212, radon and vertical mixing in the lower atmosphere (100–2 000) m 381

Hartmut Grassl: Aerosol influence on radiative cooling 386

G. Major: An effect of the circumsolar sky radiation on the Ångström pyrheliometric scale 396

A. M. Hale: On the near-shore thermal structure in Lake Huron, Canada 400

Errata

Alain Marenco and Jacques Fontan: Sources of polonium 210 within the troposphere 410

NUMBER 5

Phillip J. Smith: The kinetic energy budget over North America during a period of major cyclone development 411

Herbert Riehl: Surface interaction calculations over the Gulf of Tonkin 424

J. Egger: On the determination of an upper limit of atmospheric predictability 435

Fedor Mesinger: A method for construction of second-order accuracy difference schemes permitting no false two-grid-interval wave in the height field 444

B. F. Ceselski: A comparison of cumulus parameterization techniques 459

John L. Stanford: On the physics of stratospheric (nacreous) cloud formation 479

R. M. Welch and W. G. Zdunkowski: The effect of variations of half-widths upon outgoing radiation in a small water vapor spectral interval 483

R. W. Bergstrom, Jr and R. Viskanta: Prediction of the solar radiant flux and heating rates in a polluted atmosphere 486

W. Bach and A. Daniels: Aerometric studies in Greater Cincinnati using an integrating nephelometer 499

Ralph M. Rotty: Commentary on and extension of calculative procedure for CO_2 production 508

Shorter Contribution

K. H. Brink, G. Veronis and C. C. Yang: The effect on the ocean circulation of a change in the sign of β 518

NUMBER 6

T. N. Krishnamurti, Masao Kanamitsu, Ben Ceselski and Mukut B. Mathur: Florida State University's tropical prediction model 523

A. Quinet: The structure of non-linear processes 536

A. Quinet: Non-linear mechanisms in a non-conservative quasi-geostrophic flow which possesses 545

S. C. Mehrotra and R. E. Kelly: On the question of non-uniqueness of internal hydraulic jumps and drops in a two-fluid system 560

T. N. Krishnamurti and Masao Kanamitsu: A study of a coasting easterly wave 568

J. R. Latimer: On the Ångström and Smithsonian absolute pyrheliometric scales and the international pyrheliometric scale 1956 586

Shorter Contributions

S. Rangarajan: A note on the measurement of atmospheric turbidity 593

Ingemar Holmström: On four-dimensional data-assimilation 595
